WORK EXPERIENCE:

<u>Information Technology</u>

G & C Technologies Electronics   *Fall 2014*

- Administer technical support to users by researching and answering questions.
- Performed physical set up of desktop hardware and software.
- Performed diagnostics and troubleshooting systems.
- Resolved help desk tickets and documented solutions.
- Managed inventory and tracked all hardware and software upgrades.
- In-depth knowledge of a range of software applications and operating systems.

PROJECTS:

<u>We Travel</u>   *Spring 2022*

Collaborated with a team of engineers to develop a full stack web application. A travel application that utilizes the Vue.js framework to parse, fetch and format user gathered data into Vue components with two other programmers. Contributed to designing the messaging view and functionality.

<u>Weather App</u>   *Fall 2021*

Developed a mobile weather application using React-Native framework and JavaScript language. Utilizing OpenWeatherMap API to retrieve real time weather. Users input a zip code and are presented with the current weather.

Education

Bachelors of Science, Computer Science   *Spring 2022*

<u>CSU Channel Islands</u>, Camarillo, CA
